

## End of Year P.E.

Greenslade School will be members of the Greenwich School Sports Partnership for the next year. This means that we have access to a network of other schools who can share ideas about good practise and share opportunities for training and sporting events and competitions. With the membership Greenslade is able to send members of staff to quality P.E. training free of charge.

About the GSSP:

*'We work closely with the Greenwich borough schools to help deliver sporting initiatives in the borough of Greenwich. Using the expertise of Greenwich sports coordinators we provide the borough with opportunities that may have otherwise been out of reach. Our ultimate aim is to coordinate events with every school in the borough to help foster a community amongst both staff and pupils in Greenwich.'*

### **Greenslade School clubs**

#### **Gymnastics Club**

Having listened to the children's opinion via a survey, we set up a gymnastic club for the summer. Currently there are 16 members of this club, however there is still interest amongst other children in joining this club so it could be that we arrange to have an infant and a junior session next Spring Term involving more children.

I asked the children 'What is the best part of gymnastics club?' and the response in different wording from all was 'learning new things'.

I asked them if there was anything they wanted to do differently.

'Learn a backroll'

One of the older children said 'harder stuff' which is where a junior and infant separate club might be helpful.

I asked the children if they would come back to the club next time it was running and they **all** said yes.

I asked the coach what the successes have been. She said 'the fact that many of the children who had attended the club before had come back' proving its popularity.

I asked her what she might do differently. She said next time if there was time she would try to put on a 15 min show that parents could come to watch at the end of the term, however there wasn't time this time around.

## **Quick survey end July 2018**

There are currently 21 members of the football club and none are girls.

I asked the children if they could choose ONE sports activity or club to do that they do not currently. In Year 5, seven said dance and seven said swimming.

In Years 4 and 5, ten people showed an interest in a tennis club.

In Year 1, 5 children also expressed an interest in dance club.

In Year 1, 10 children wanted to go to football club.

I also asked Year 1 who would like to do swimming in school. 20 said they would. I asked those who said no if they could give a reason why not and this was 'because I am bad at it' or 'scared'.

### **Dance**

Given that fewer girls attend clubs than boys, particularly in KS2 and lots of girls were interested in a dance club it may be worth considering organising dance club in school.

Additionally, we could have someone who 'leads' a dance session at certain lunchtimes, and then children join in as an extra activity as and when.

### **Swimming**

I think that organising for another year group to go swimming would be something to work towards. This could also ensure that more people are able to swim by the time they leave primary school.

This could involve teaching children earlier so that they have confidence in the water at an earlier age and then ensuring that those who still haven't by Year 6 receive 'catch up' sessions.

### **Swimming Outcomes**

In our current Year 6 (2018 / 2019) the outcomes are as follows.

88% of our children can swim competently, confidently and proficiently over a distance of at least 25 metres.

88% of our children can use a range of strokes effectively.

32% of our children can perform self-rescue in different water-based situations.

The outcomes from a more detailed survey are currently being compiled.
